

2022 Paid Internship at Highland Vineyards and Winery

Wamego, Kansas

Eligibility: Must be current college student majoring in Food Science, Horticulture, or related field of study. Must be 21+ years of age.

Duties: Assist Vineyard Manager and Winemaker with various tasks both in the vineyard and in the winery. Tasks include but are not limited to planting, training, and pruning vines; trellis maintenance; harvesting grapes; laboratory analysis of grapes, juice, and wine; set-up and operate pumps, hoses, and other winery equipment.

Experience + Benefits:

- Gain working knowledge of growing grapes and other specialty crops
- Gain experience with machinery used in the vineyard and winery
- Gain experience working in a professional, commercial vineyard and commercial winery
- Flexible schedule, 15-25 hours per week
- Pay Rate: \$10 per hour

Send Resume and Cover Letter to: skohl@highlandcc.edu

About Highland Vineyards and Winery:

In 2010, Highland Community College started degree and certificate programs in Viticulture (grape growing) and Enology (winemaking). As the grapevines matured, Highland Vineyards and Winery was born using grapes from the college vineyards. In 2019, the program took another great leap to form the business incubator called 456 Wineries. Highland Vineyards and Winery is the host winery in the incubator which has space for up to five clients that want to start a winery. Each client in the incubator is independently licensed through TTB and ABC. The incubator clients share winemaking equipment and the winery tasting room for sampling and sales.
