(See also mini donation flyer w/ QR codes.)

GLADE STRIP initial mix (put down Jan. 2021):

Grasses:

Sideoats Grama - *Bouteloua curtipendula*

Prairie Dropseed - *Sporobolus heterolepis*

Little Bluestem - *Schizachyrium scoparium*

Flowers:

Lanceleaf coreopsis - *Coreopsis lanceolata*

Plains Coreopsis - *Coreopsis tinctoria*

Red Columbine - *Aquilegia canadensis*

Smooth Aster - *Symphiotrichum laeve*

Partridge Pea - *Chamaecrista fasciculata*

Cat's Claw Sensitive Briar - *Mimosa quadrivalvis*

Cusp Blazingstar - *Liatris mucronata*

Whorled Milkweed - *Asclepias verticillata*

Purple Prairie Clover - *Dalea purpurea*

Fuzzy Bean - *Strophostyles helveola*

Rose Verbena - *Glandularia canadensis*

Slender Mountain Mint - *Pycnanthemum tenuifolium*

My '22-'23 SHADE Mix (#s rounded):

25% - Canada wildrye - *Elymus canadensis*

25% - Virginia wildrye - *Elymus virginicus*

25% - Early wildrye - *Elymus macgregorii*

8% - River Oats - *Chasmanthium latifolium*

7% - Hairy woodland brome - *Bromus pubescens*

3% - Fuzzy wuzzy sedge - *Carex hirsutella*

3% - Purple Joe Pye weed - *Eutrochium purpureum*

2.5% - Bottlebrush wildrye - *Elymus hystrix*

1% - Brown-eyed Susan - *Rudbeckia triloba*

1% - American Lopseed - *Phryma leptostachya*

0.6% - Silky wildrye - *Elymus villosus*

0.3% - Cinna (Stout wood reed) - *Cinna arundinacea*

0.09% - *Agastache nepetoides*, *Osmorhiza longistylis*, *Aquilegia canadensis*

Percentages are by weight. If I was more of a pro I'd use a **seed CALCULATOR** to account for smaller/lighter seeds and arrive at percentages based on number of seeds. (Thankfully the bulk of the seeds in the above list are similarly sized. But if I had equal weights of hairy woodland brome and *Cinna* for instance, I'd have TWELVE TIMES the number of *Cinna* seeds.)
